SOFTWARE DEVELOPMENT EXPERIENCE

Independent Software Developer / Self-Directed Development

Hands-On Experience

- Developed responsive websites and applications using HTML, CSS, and JavaScript.
- Built and actively maintaining a responsive personal portfolio website and a professional-grade task management web application.

-
- Designed and implemented user interfaces with a focus on responsiveness and usability.
- Used JavaScript to create interactive and dynamic web functionality.
- Continuously improving development practices through self-directed learning and practical projects.
- Applied an increasing focus on security when developing and reviewing web applications.

PROJECTS

Responsive Portfolio Website

Technologies: HTML, CSS, React JS and JSX

- Designed and developed a responsive personal portfolio website.
- Implemented responsive layouts for different screen sizes.
- Includes interactive functionality built using React JS.
- Focused on clean structure, usability, and maintainable front-end code.

SprintDesk

Technologies: React, JavaScript, JSX, HTML, CSS

- A professional, enterprise-grade Kanban task management web application.
- Building reusable components and learning how components can be structured into larger applications.
- Currently showcasing client-side development, with an upcoming goal of integrating a C#/.NET backend to the project.
